I. PURPOSE AND SUMMARY

H.R. 4555, the “Oral Health Literacy and Awareness Act of 2021,” would authorize a public education campaign across all relevant programs of the Health Resources and Services Administration (HRSA) to increase oral health literacy and awareness.

II. BACKGROUND AND NEED FOR LEGISLATION

Oral health, defined as the health of the teeth, gums, and the entire oral-facial system, is an integral component of general health and well-being. Cavities (tooth decay), gum (periodontal) disease, and oral cancer are the most common yet preventable diseases affecting oral health.¹ More than one in four adults have untreated cavities, and nearly half of those aged 30 or older show signs of gum disease, which if left untreated can lead to tooth loss.² The consequences of poor oral health for adults and children include an annual average of 34 million school hours lost due to emergency dental care and an over \$45 billion loss in productivity in the United States due to untreated dental disease.³

Regular preventive dental care can catch oral health problems early when they are easiest to treat.⁴ However, less than half of the American population uses the oral health care system.⁵ A key tool in increasing utilization of the oral health care system and preventing poor oral health is the promotion of oral health literacy (OHL), or “the individual capacity to understand and use dental information to transform oral health behaviors.”⁶ Individuals with limited OHL have been found to have increased risk for poor oral health such as higher risk for periodontal disease.⁷ Emerging evidence suggests that improving OHL may help to increase adherence to medical instructions, self-management skills, and overall treatment outcomes.⁸

H.R. 4555 directs HRSA to implement a public education campaign across all relevant programs to increase OHL and awareness, including through the health center program, oral health workforce programs, maternal and child health programs, the Ryan White HIV/AIDS Program, and the rural health programs. The legislation authorizes \$750,000 each year for fiscal years 2022 through 2026 to carry out the awareness campaign. This bill will also help HRSA to identify strategies that will provide insight into the outcomes and effectiveness of targeted oral health literacy campaigns and will inform future efforts to improve OHL for all Americans.

III. COMMITTEE HEARINGS

For the purposes of section 3(c) of rule XIII of the Rules of the House of Representatives, the following hearing was used to develop or consider H.R. 4555:
